Viber	Rakuten	Invalid Application.
Wired XDisplay Agent 1.3	Splashtop	Invalid Application.
Wired XDisplay Agent 1.5 Administration Client 10.2	Splashtop OpenText	Invalid Application.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Administration Client 10.2 Administration Client 10.5	OpenText	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Administration Client 16.2	OpenText	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
ALM Client Launcher 4.1	Micro Focus	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
AnyConnect Secure Mobility Client 3.1	Cisco	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
AnyConnect Secure Mobility Client 4.1	Cisco	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
AnyConnect Secure Mobility Client 4.10		This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
AnyConnect Secure Mobility Client 4.2	Cisco	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
AnyConnect Secure Mobility Client 4.3	Cisco	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
AnyConnect Secure Mobility Client 4.4	Cisco	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
AnyConnect Secure Mobility Client 4.5	Cisco	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
AnyConnect Secure Mobility Client 4.6	Cisco	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
AnyConnect Secure Mobility Client 4.7	Cisco	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is improved in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is improved in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
AnyConnect Secure Mobility Client 4.8  AnyConnect Secure Mobility Client 4.9	Cisco Cisco	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
AppsAnywhere 1.4	Software2	Inis Application is ignored in Tavor or new windcarding fulle for non-commercial applications. All related evidences are mapped to respective major version or the Product.  This Application is ignored in favor of new windcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
AppsAnywhere 1.5	Software2	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Aspen Process Modeling	Aspen Technology	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to especiate important or the roduct.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to especiate major version of the Product.
AWS Tools 3.0	Amazon	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
AWS Tools 3.1	Amazon	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
AWS Tools 3.13	Amazon	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
AWS Tools 3.15	Amazon	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
AWS Tools 3.3	Amazon	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
AWS Tools 3.7	Amazon	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
AWS Tools 3.8	Amazon	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
AWS Tools 3.9	Amazon	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Backup Management Console 11.0 Bentley View 3.13	Acronis Bentley Systems	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Bentley View 3.15 Bentley View 3.15	Bentley Systems	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Bentley View 8.1	Bentley Systems	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Bentley View 8.11	Bentley Systems	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Bentley View 8.5	Bentley Systems	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
CANopen Communication DTM Library		This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Cloud Data Loader 10.2	Jitterbit	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Cloud Data Loader 10.3	Jitterbit	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Cloud Data Loader 8.16	Jitterbit	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Cloud Data Loader 8.7	Jitterbit	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Computer Aided Product Selection 4.3	Greenheck Fan	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Data Access Components 2.8 Deswik.vSched 2021.2	Microsoft	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
DirectControl-curl 5.5	Deswik Mining Consultants Centrify	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
DirectControl-Idapproxy 5.2	Centrify	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
DirectControl-Idapproxy 5.3	Centrify	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
DirectControl-Idapproxy 5.4	Centrify	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
DirectControl-Idapproxy 5.5	Centrify	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
DirectControl-openssh 8.8	Centrify	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
DirectControl-openssl 5.5	Centrify	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Easy Setting Box 1.1	Samsung	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Enable Now Producer 10.3	SAP	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
e-SAT/IN 1.1	Waters	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
e-SAT/IN 1.2 e-SAT/IN 1.3	Waters Waters	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
e-SAT/IN 1.3 Evaporative Light Scattering Detector 1.		Inis Application is ignored in favor of new willocarding fulle for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Evaporative Light Scattering Detector 1.		This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Evaporative Light Scattering Detector 1.		This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
eXpress PXE Server 3.1	Broadcom	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
eXpress PXE Server 5.6	Broadcom	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
eXpress PXE Server 6.1	Broadcom	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
eXpress PXE Server 6.5	Broadcom	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
eXpress PXE Server 6.8	Broadcom	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
eXpress PXE Server 6.9	Broadcom	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is inspected in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to present the major version of the Product.
HiPath 3000 Manager 70.5	Siemens REALIX	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
HWiNFO 7.12 iControl 5.5	METTLER TOLEDO	Ihis Application is ignored in Tavor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in Tavor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
iControl 6.1	METTLER TOLEDO	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
iControl 6.2	METTLER TOLEDO	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
iFunBox 3.1	iFunBox	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
iFunBox 4.2	iFunBox	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Intrusion Detection Systems 2.1	HP	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Intrusion Detection Systems 3.1	HP	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Intrusion Detection Systems 4.1	HP	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Intrusion Detection Systems 4.2	HP	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Inventor Plug-In 1.7	Autodesk	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Inventor Plug-In 1.8	Autodesk	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
iPass Open Mobile 2.14 iPass Open Mobile 2.3	iPass iPass	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
iPass Open Mobile 2.9	iPass	Into Application is ignored in Tavor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in Tavor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
iSEEK AnswerWorks Runtime 10.0	Vantage Linguistics	This Application is ignored in favor of new wiidcarding rule for non-commercial applications. All related evidences are mapped to respective major version for the Product.  This Application is ignored in favor of new wiidcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
	Schneider Electric	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
iTools 3.3		
iTools 3.3 Kerberos V5 Client 1.1	HP	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
	HP HP	Inis Application is ignored in ravor or new wilocarding rule for non-commercial applications. All related evidences are mapped to respective major version or the Product.  This Application is ignored in favor of new wilocarding rule for non-commercial applications. All related evidences are mapped to respective major version or the Product.
Kerberos V5 Client 1.1 Kerberos V5 Client 1.2 Kerberos V5 Client 1.3	HP HP	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Kerberos V5 Client 1.1 Kerberos V5 Client 1.2 Kerberos V5 Client 1.3 LibreOffice Impress 6.4	HP HP The Document Foundation	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Kerberos V5 Client 1.1 Kerberos V5 Client 1.2 Kerberos V5 Client 1.3	HP HP	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.

Micom S1 Agile 1.3	ALSTOM	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
Micom S1 Agile 1.4	ALSTOM	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are impaged to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are impaged to respective major version of the Product.	
MiCOM S1 Agile 2.1	ALSTOM	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
MP Author 6.4	Silect Software	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
MP Author 8.1 Network Card Configuration Utility 2.0	Silect Software Brady Worldwide	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
NPartition Commands 1.2	Hewlett Packard Enterprise	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
NPartition Commands 1.3	Hewlett Packard Enterprise	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
NPartition Commands 2.1	Hewlett Packard Enterprise	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
OCR Software 12.3 OCR Software 14.5	HP HP	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
openIdap2-client 2	nr	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
openIdap2-client 2	United Linux	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
OpenLynx Browser 4.1	Waters	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
OpenText CAD Manager for Autodesk Au OpenView Storage Area Manager Applic		This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
OpenView Storage Area Manager Applic		This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
Performance Tuning Framework 1.2	HP	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
Performance Tuning Framework 1.3	HP	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
Performance Tuning Framework 1.4 Performance Tuning Framework 1.5	HP HP	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
Performance Tuning Framework 1.6	HP	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
Performance Tuning Framework 2.08	HP	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
Performance Tuning Framework 2.15	HP	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
Performance Tuning Framework 2.2 perl-CPAN-Meta-YAML 0.018	HP Oracle	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PI Analysis Framework Client 1.3	OSIsoft	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PowerShell for Mac 6.1	Microsoft	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
Premium Suite 6.2	Evolis	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
Premium Suite 6.3 Print Preview 2.1	Evolis HP	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
Print Preview 2.1 Print Preview 2.2	HP	This Application is ignored in favor of new wildcarding rule for non-commercial applications. An related evidences are mapped to respective major version of the Product. This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
Print Preview 3.2	HP	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
Processor Identification Utility 6.1	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
Processor Identification Utility 6.3 Processor Identification Utility 6.4	Intel Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
Processor Identification Utility 6.5	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
Processor Identification Utility 6.6	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
Processor Identification Utility 6.7 Processor Identification Utility 6.8	Intel Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is improved in Favor of pew wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
Processor Identification Utility 6.8 PROSet/Wireless Software 20.1	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless Software 20.2	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless Software 20.6	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless Software 20.7	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless Software 20.9 PROSet/Wireless Wi-Fi Connection Utilit	Intel Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless Wi-Fi Connection Utilit	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 12.0	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 12.01	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 12.04 PROSet/Wireless WiFi Software 14.1	Intel Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 14.2	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 15.1	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 15.2 PROSet/Wireless WiFi Software 15.3	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 15.6	Intel Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 15.8	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 16.1	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 16.6 PROSet/Wireless WiFi Software 16.7	Intel Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 17.1	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. An related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 17.12	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 17.13	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 17.14 PROSet/Wireless WiFi Software 17.16	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 17.10	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 18.12	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 18.20	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 18.21 PROSet/Wireless WiFi Software 18.30	Intel Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 18.31	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 18.32	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 18.33	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 18.40 PROSet/Wireless WiFi Software 19.1	Intel Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 19.10	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 19.20	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 19.30 PROSet/Wireless WiFi Software 19.40	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 19.46	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 19.50	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 19.60 PROSet/Wireless WiFi Software 19.70	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 19.70 PROSet/Wireless WiFi Software 19.71	Intel	Inis Application is ignored in Tavor of new windcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 19.8	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 20.10	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 20.110 PROSet/Wireless WiFi Software 20.120	Intel Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 20.20	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 20.30	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 20.40	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 20.5 PROSet/Wireless WiFi Software 20.50	Intel Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 20.60	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 20.70	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 20.80 PROSet/Wireless WiFi Software 20.90	Intel Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is improved in Favor of pew wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 20.90 PROSet/Wireless WiFi Software 21.10	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 21.20	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 21.30	Intel	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PROSet/Wireless WiFi Software 21.40 PRTG Desktop 19.3	Intel Paessler	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PRTG Desktop 19.3 PRTG Desktop 20.1	Paessier	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PRTG Desktop 20.3	Paessler	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PRTG Desktop 20.8	Paessler	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
PRTG Desktop 21.1 PRTG Desktop 21.4	Paessler Paessler	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
Pump Control Software 2.4	Waters	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	
Pump Control Software 3.2	Waters	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.	

Pump Control Software 3.3	Waters	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
PyCrypto 2.6	Darsey Litzenberger	This Application is ignored in ravor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
PyCrypto 2.7	Darsey Litzenberger	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Qsync Client 2.1	QNAP Systems	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Osync Client 2.2	QNAP Systems	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Qsync Client 3.1	QNAP Systems	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Qsync Client 4.3 Qsync Client 4.4	QNAP Systems	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Qsync Client 4.4  Qsync Client 4.5	QNAP Systems QNAP Systems	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
rh-git 2.2	Red Hat	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
rh-git 2.9	Red Hat	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
RStudio 1.2 Pro	RStudio	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
SCP Server 1.1	SolarWinds	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
SCP Server 1.2 SCP Server 1.3	SolarWinds	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
SCP Server 2.2	SolarWinds SolarWinds	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
SCP Server 20.3	SolarWinds	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Secure Endpoint Manager 11.3	SonicWALL	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Secure Endpoint Manager 11.4	SonicWALL	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Secure Endpoint Manager 12.2	SonicWALL	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Secure Endpoint Manager 12.3	SonicWALL	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Secure Endpoint Manager 12.4 Secure VPN 1.10	SonicWALL AVG	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Security Administration 1.7	Thermo Fisher Scientific	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
ShareFile Storage Zones Controller 2.3	Citrix Systems	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
ShareFile Storage Zones Controller 3.1	Citrix Systems	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
ShareFile Storage Zones Controller 3.2	Citrix Systems	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
ShareFile Storage Zones Controller 3.4	Citrix Systems	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
ShareFile Storage Zones Controller 4.3 ShareFile Storage Zones Controller 5.1	Citrix Systems Citrix Systems	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
ShareFile Storage Zones Controller 5.10	Citrix Systems	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
ShareFile Storage Zones Controller 5.3	Citrix Systems	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
ShareFile Storage Zones Controller 5.5	Citrix Systems	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
ShareFile Storage Zones Controller 5.6	Citrix Systems	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
ShareFile Storage Zones Controller 5.7 ShareFile Storage Zones Controller 5.8	Citrix Systems Citrix Systems	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
ShareFile Storage Zones Controller 5.8 ShareFile Storage Zones Controller 5.9	Citrix Systems Citrix Systems	Inis Application is ignored in ravor or new wilocarding rule for non-commercial applications. All related evidences are mapped to respective major version or the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Ship Manager 26.00	FedEx	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Ship Manager 28.07	FedEx	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Ship Manager 29.00	FedEx	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Ship Manager 29.12	FedEx	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Ship Manager 29.15 Ship Manager 30.09	FedEx FedEx	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Ship Manager 30.11	FedEx	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Ship Manager 30.12	FedEx	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Ship Manager 31.00	FedEx	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Ship Manager 31.1	FedEx	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Ship Manager 33.10 Ship Manager 33.11	FedEx FedEx	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Ship Manager 33.11	FedEx	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.  This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Ship Manager 35.07	FedEx	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Ship Manager 35.08	FedEx	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
Ship Manager 35.13	FedEx	This Application is ignored in favor of new wildcarding rule for non-commercial applications. All related evidences are mapped to respective major version of the Product.
